

Agenda

- **Where We Are**

- Current Technical and Functional Assessment

- **Where We Are Going**

- Spiral Assessment Process
- Current TDDT schedule

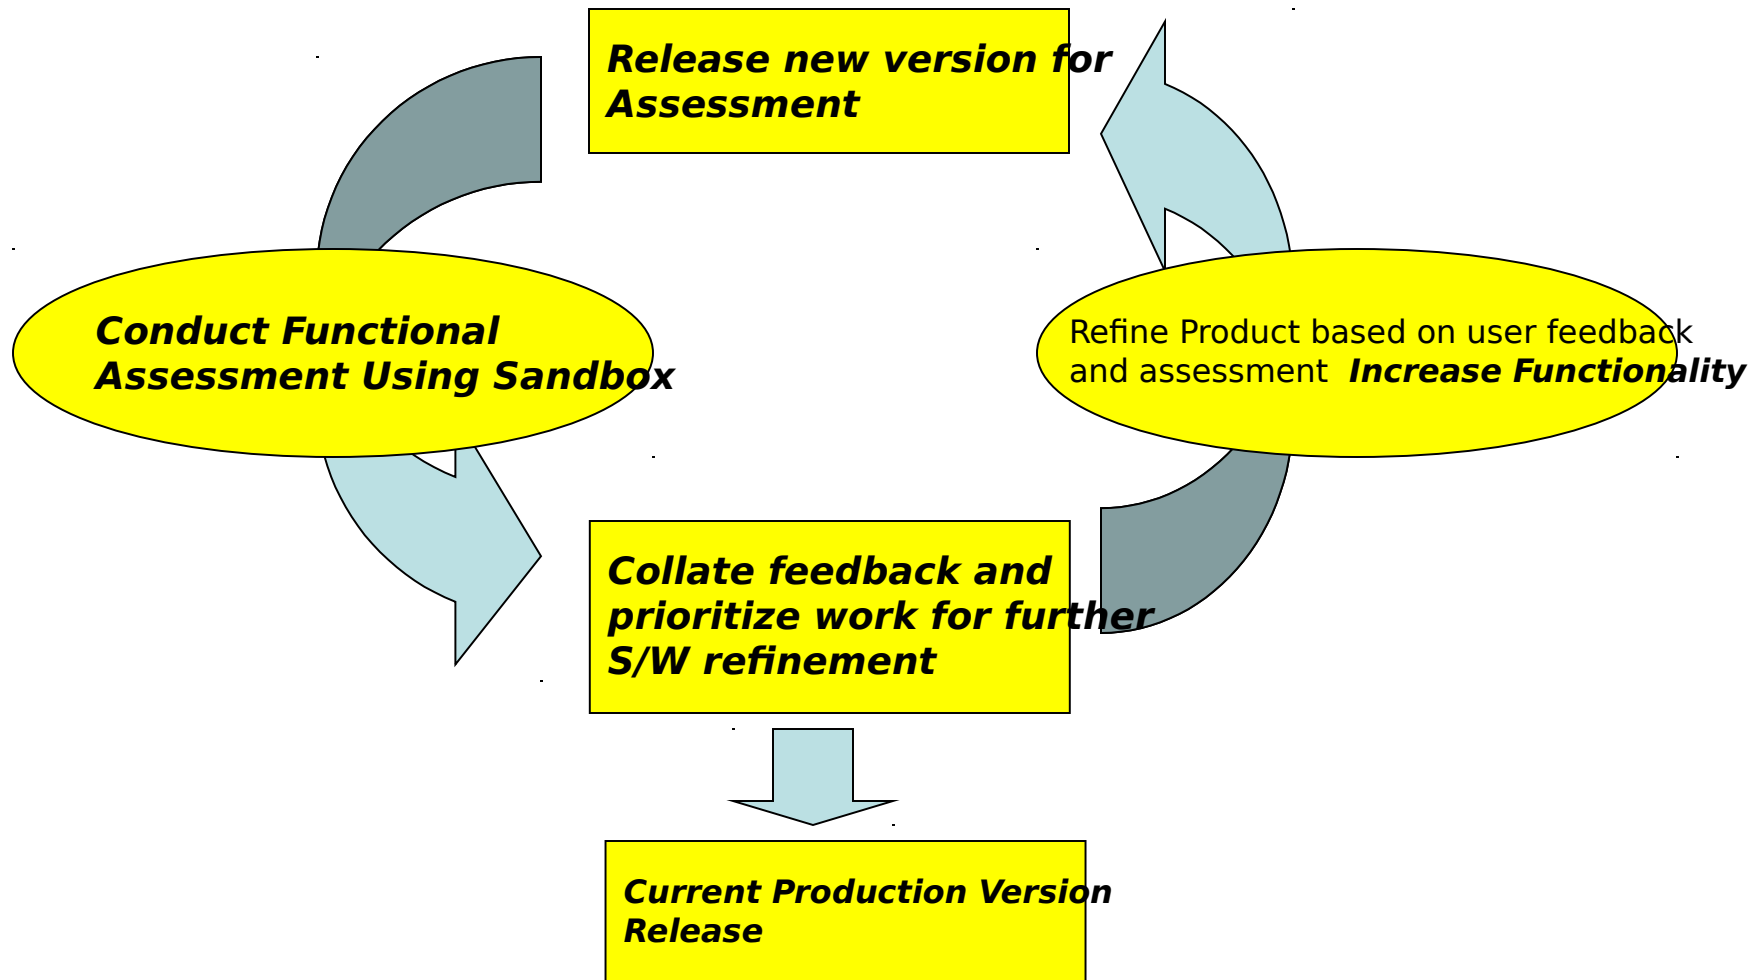

TDDT - Functionality

- ATIA-M transition to PEO STRI 1st Qtr FY05
- Major functionality added with this release is the Training and Doctrine Development Tool.
 - **70%** or better - Includes Collective Tasks , Individual Tasks , Drills, Job Task Lists, Unit Task Lists, Mission Training Plans (MTP), Soldier Training Publications (STP),
 - **50%** or better - Individual Training Support Packages (TSP), Lessons, Courses, and
 - **10%** or less - Combined Arms Training Strategies (CATS)
- Does not include Doctrine piece, but has common capabilities of trainers and doctrine writers, i.e., “Create a Document”.

TDDT - User Reviews

- FCS folks using Collective Task functionality
- TDDT overall assessment
 - Quantitative/code delivered 100%
 - Data Base consolidation – 95%
 - Qualitative/Usability – 60%

TDDT Spiral Assessment Process

Sandbox Purpose

- Feedback on functionality
- Increase familiarization of TDDT to reduce train up prior to implementation
- Developers can review their data in a consolidated db view and plan clean up before final data call

Current TDDT Fielding Timeline

- **Phase 1 Establishing POCs and SMEs**
(Complete NLT 17 May)
- **Phase 2 POCs Sandbox Systems Admin Test and Confirmation** **(Complete NLT 31 May 04)**
- **Phase 3 TDDT User Evaluation**
(Complete NLT 12 July 04)
- ★ • **CRCB Functionality Prioritization** **(Week 19-23 July)**
- **Phase 4 Continue full scale effort on final modification upon receipt of FY05 funding**

Phase 1 Establish Evaluation POC/SMEs

- TDADD will establish SMEs for functionality check NLT 14 May 04
- TDADD and CTD POC will select primary SMEs to test
- Proponent POC will consolidate SME feedback and forward to TRADOC POC (TDADD/CTD/ATSC)

Phase 2 System Admin Test and Confirmation

- Never tested TDDT with such a volume of users
- Assumption is the admin data of ASAT migrated to TDDT
- Will first require proponent POCs/SAs to validate permissions for their selected SMEs using TDDT Sys Admin prior to giving permission to use the sandbox

10-14 May

Phase 3 TDDT User Evaluation

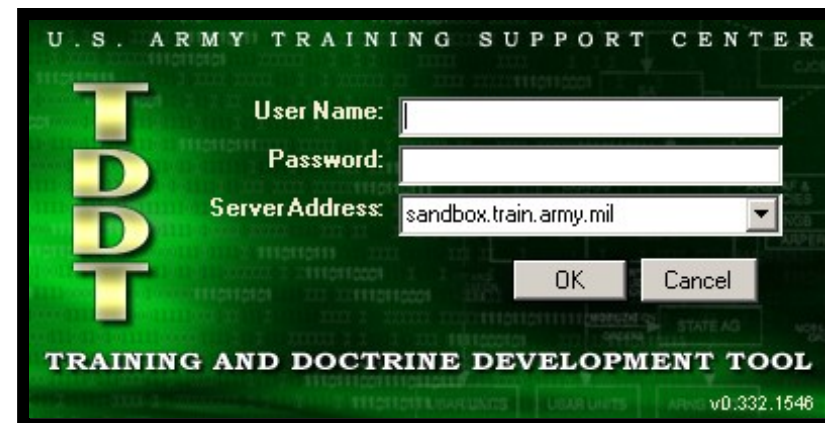

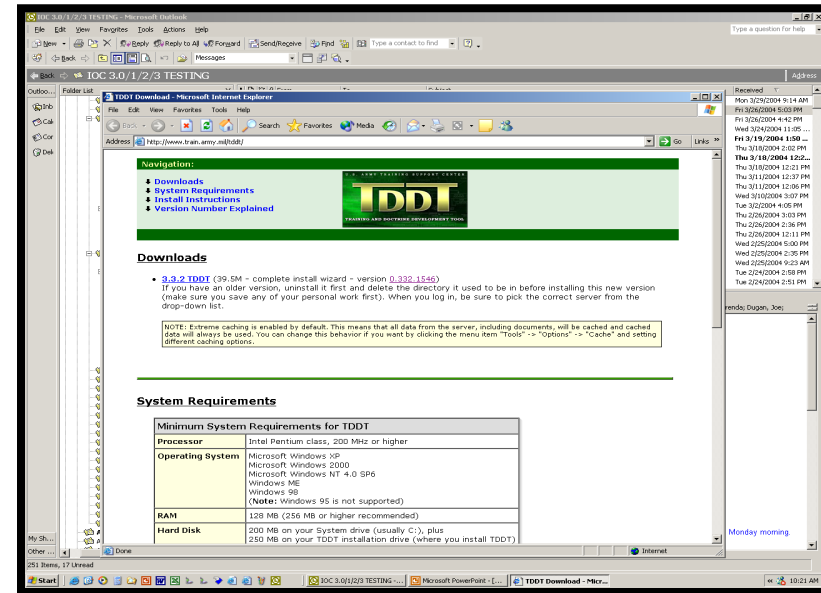

- SMEs will test in their particular task areas and provide feedback to POCs
- POCs to filter/consolidate input prior to forwarding to TRADOC
- POCs complete and forward reports
- Concurrently TRADOC HQ (CTD/ITD/TDADD) collaboration for Business Rules on data clean up process and milestones

Configuration Control Board Review Prioritization

- Present feedback snap shot and process
- Feedback to support UC/FP priority decisions
- Should have “next generation” TDDT and db tested to show CRCB. TDB send message for next version

Use of the ATIA TDDT SANDBOX

- Delete any previous version of TDDT
- Go to URL:
www.train.army.mil/tddt
- Install TDDT
- User ID and PW are same as your on AKO (provided you had an AKO in your ASAT user group info)
- Server address is:
sandbox.train.army.mil

INITIAL REPORTABLE EVALUATION AREA

MTP			
	Create MTP FP.doc	20	No entry for MTP number or title.
	Edit MTP FP.doc	20	Chapter text entries are limited and do not hold format. Cannot enter multimedia. References does not work.
	Copy MTP FP.doc	70	No selection option on what attributes are copied.
	Find MTP FP.doc	90	Need to hide some options and correctly label remaining options.
	Manage MTP FP.doc	20	Security is not applied to the fine grain level.
	Create Unit Task List FP.doc	90	Need corrections to migrated data.
Collective Task			
	Develop Collective Training UC.doc	80	
	Create Collective Task FP.doc (OPFOR?)	90	Some of the related data options are missing, i.e. user/person and reference objects.
	Edit Collective Tasks FP.doc	80	Need refinement on Performance Steps and Measures.
	Find Collective Task FP.doc	90	Need to hide some options and correctly label remaining options.
	Copy Collective Task	80	No selection option on what attributes are copied.
	Manage Collective Task FP.doc	50	Security is not applied to the fine grain level.

Col Reports			
	Collective Task Summary Report	100	
	Collective Synopsis Report (RTF)	100	
	ARTEP/MTP Synopsis Report	0	
	Miscellaneous Collective Report	100	
Drills			
	Create Drill FP.doc	70	Several attributes are missing, i.e. talk, walk, run text.
	Edit Drill FP.doc	70	Migration problem with some data not showing.
	Copy Drill FP.doc	80	No selection option on what attributes are copied.
	Find Drill FP.doc	90	Need to hide some options and correctly label remaining options.
	Manage Drill FP.doc	50	Security is not applied to the fine grain level.
	Build Drill UC.doc	70	
Drill Reports			
	Drill Synopsis Report	100

CDRL Item A0000

Coordinating Draft

The screenshot shows a web browser window titled 'TDDT Help'. The left sidebar contains a navigation tree with the following items: Overview, Collective Development, Collective Task (selected), Unit Task List, Mission Training Plan (MTP), Course Development, Individual Development, System Security and Administration, and Technical Information. The main content area is titled 'Collective Task' and contains the following text:

The primary purpose of collective task development is to deliver standard task data to a specific unit.

To **Add** a Collective Task, select **Start a New Document** from the **Select a Task** window, or select **File**, and then **New** from the File main menu and the **New Document** dialogue box will display.

To **Edit** a Collective Task, you may either select **File**, and then **Open** (which searches for the document on your computer) or select **File**, and then **Open from the Server** from the main menu.

- The **Open from the Server** selection displays a dialogue box that will begin the selection and **filtering** process to retrieve the document you need.

The Collective Task will then display in the Record Panel. **NOTE:** in some sections **Alt, click** on an item will display that item's underlying information.

Number	Enter the standardized task number in the text dialogue box.
Title	Enter title. Title must contain an action verb, an object and may contain a qualifier that identifies unit type and level, i.e., Perform Hasty Decontamination (Mopp Gear Exchange) DB: ADA.
Domain	Select domain from the picklist.
TD Proponent	Select proponent from the picklist.
Task Status	Select status from the picklist.
Status Date	Select date from the calendar.
Approval Date	Select date from the calendar.
Effective Date	Select date from the calendar.
Creation Date	Read only.
Migration Source	Read only.
Task Type	Make selection from the picklist.
Distribution Restriction	Select restriction from the picklist.
Related Persons	In the Related Data pane: <ol style="list-style-type: none">Click the dropdown arrow,highlight your selection,click the Go button.From the search results list, highlight selection and drag item to record panel and drop or drop in the Edit Links Dialogue Box.Select OK, if dropped in the Edit Links box.

SANDBOX FEEDBACK

- Each POC has been identified by TDAD. Each will send Elaine Tarr [elaine.tarr@atsc.army.mil] and email to establish an email group for this SANDBOX
- Each proponent POC (with RDL upload authority) will consolidate THEIR SME comments, filter out duplicates and non functional comments.
- Other proponents (CTD for CATS, Digital, etc) will collaborate with agencies for feedback.
- Feedback will be submitted in the provided spread sheet format to Elaine Tarr elaine.tarr@atsc.army.mil cc: joe.dugan@atsc.army.mil and melody.jones@atsc.army.mil
- SMEs will comment only on their specific areas. SME can become familiar with other areas but not to be reported until directed to do so.
- No specific direct feedback will be provided to the SME. SME might be called for further details if necessary.
- New TDDT version releases will have release notes.

Get it from <http://www.train.army.mil/tddt/>

Fixes/enhancements:

- Fixed: If user cancels Login - just cancel that one dialog, not the whole system login
- Fixed: If user couldn't edit, they could still save to database
- Fixed: Users could automatically edit cached documents without checking their permission
- Fixed: Don't let users check in documents they haven't checked out first
- Fixed: Save to database asks twice if user wants to check out
- Fixed: ColTask error when user tries to copy a task, modify it, and save it to the dB
- Fixed: Better top Menu handling
- Fixed: Special characters < > etc... Are being turned into < and >, which screws up the XML
- Fixed: Bad XML when saving a document that contains nested tables (e.g. Access Group View)
- Added: A toolbar
- Added: Ask to check out cached documents to make them editable or not
- Added: Automatically check in on save to database
- Added: Ability to refresh an open document
- Added: Logout option to menu and toolbar
- Added: Icons in menu

SANDBOX REPORT FORMAT

(DO NOT CHANGE OR ADD FEATURES/OBJECTS)

PROPONENT: <u>CAC-T/CTD-Digital</u> TDDT FEEDBACK REPORT FOR WEEK <u>17-21 May 04</u> TDDT Version # <u>3.3.2.1546</u>

TDADD FUNCTIONAL CHECKLIST

ATIA-OA function check list

Functional Check Lists

This document includes the functional checklists that you should use when reviewing automated systems that support Army education and training. They are organized IAW the ATIA-OA.

Comments on each item can be provided but please reference the number.

Critical functions are marked with an " * "

1.1, Needs Analysis Checklist

Verify that the automated system meets the following requirements:	YES	NO
1. The system provides the capability to capture the triggering circumstance.		
2. The system provides the capability to capture personnel interviews documentation.		
3. The system provides the capability to capture the cause of identified performance deficiency(ies) captured.		
4. The system provides the capability to capture the required performance.		
5. The system provides the capability to capture both training and non-training solution(s) to the performance deficiency(ies) recommendations.		
6. The system provides the capability to capture the appropriate command approval for the recommended performance deficiency(ies) solutions captured.		
7. The system provides the capability to automatically distribute approved solutions to the office or agency responsible for implementing the solutions.
